

PROJECT OVERVIEW

PHASE 3
Hwy 95 to
Yoho Bridge (8.5 km)

PHASE 1
Yoho Bridge
(3.2 km)

PHASE 2
Park Bridge
(5.8 km)

PHASE 3
Brake Check to
Yoho Park (8.8 km)

- The Kicking Horse Canyon project is a top priority for the Government of British Columbia
- Total project length is 26 kilometres
- The project has been divided into four major sections, to be constructed in three phases
- Total cost is estimated at \$730 million, shared with the Government of Canada
- Improvements include:
 - Highway widening to 4 lanes with a design speed of 100 km/hr
 - Improved alignments, replacement of narrow bridge structures
 - Other design innovations to reduce hazards
- The route carries over 9,000 vehicles per day during the summer
